COPIES TO

Rev Level	Date	Description	By
1	2.18.20	First Draft.	MAK
2	11.13.20	Updated to Reflect R&R Revisions.	hjm

Revise & Resubmit Response Matrix		
Item-	Comment-	Response-
1	Mechanical Spares: It appears as though Webb simply applied a percentage of total quantities.	Updated
2	The slope plate makeup units section lacks pricing information and criticality levels.	Added
3	Quantities recommended - 25 slope plate pallets(SS carrier pans), truly recommended/critical; or just a %?	Adjusted
4	Webb MIT Enclosures section lacks the source, recommended quantity and pricing information. Also lists nothing as "Critical".	Completed
5	The Criticality section for Portec (power turns) is not completed.	Completed
6	The Siemens HSD spares total approx. \$340K due to the quantities recommended. This section should be scrubbed as Webb/Siemens is recommending at least 16 of each (i.e. servo motor is \$33,119 X 16 = ~\$530k).	Siemens provides a list of HSD spares with the instruction that they recommend a set for every 8 HSDs installed. The original numbers represented that quantity. The number has now been lowered to a minimum quantity to spare, column D, while still indicating Siemens recommendation in Column C.
7	"Computer" parts not listed - regardless of spare recommendation, the main components should be listed.	Computer parts were previously combined with electrical parts. They have been divided are are now a separate tab.
8	If this is considered to be the "Final", Webb needs to provide the following per the 1.6.N below. It is assumed these items (mfg list and product data) will be in the O&M and will likely not be part of this submission. 1) where used for each part in the system, complete list of manufacturers, all associated product data.	1.6 N-items 2a,b, d-j-found on spare parts pages. 1.6N-item 2c-The Spare Parts List identifies all the components of each type of assembly in the system. The Conveyor Manifest identifies the naming and location of each assembly in the system. A final, As-built Conveyor Manifest will be supplied as a reference to identify all the locations of various assemblies throughout the system. 1.6 N-item 2k-Found as a separate tab in spare parts list excel doc. 1.6 N-item 2l-Manufacturer's Litureture is located in Chapter M10 of the O&M.
9	Parts for the hoist as required per 2.9.C below, was removed from Webb's scope and should be accounted for by POJV.	N/A
10	All proprietary parts need to be listed as such per 1.10.S below.	All Webb manufactured components are included in the various assembly parts lists and are readily available for purchase.
11	The list is silent on the recommended specific test instruments (or special tools).	Added

PARSONS - ODEBRECHT, J.V.
 Baggage Handling System Improvements
